Professional Summary

Industrial engineering student at Lamar University, with earlier data engineering study at Texas A&M; University. Experience in multimodal AI evaluation, NASA L'SPACE mission analysis, Austin ISD classroom instruction, claims processing, and customer operations.

Education

B.S., Industrial Engineering (in progress) | Lamar University, Beaumont, Texas — August 2026 – Present

Data Engineering coursework | Texas A&M; University, College Station, Texas — August 2024 – May 2026

A.S., Business Administration; A.A., General Studies (GPA 3.7) | Austin Community College, Austin, Texas — May 2024

Work History

AI Trainer, Visual Data Reasoning Expert | Handshake AI Fellowship, Contract — May 2026 – Present

– Evaluated multimodal model output on charts, diagrams, dense text, and other information-rich images for accuracy and reasoning.

– Wrote visual question-answer pairs and annotation feedback used as training and evaluation data.

Substitute Teacher | Austin Independent School District, Austin, Texas — April 2025 – Present

– Current assignment is substitute coverage across K–12 subjects.

– Taught middle-school Career and Technical Education: Principles of Applied Engineering, Career and College Exploration, General Employability Skills, and Web Communications.

– Built labs on the engineering design process (criteria, constraints, prototype, test, and documented iteration) and prepared bilingual student materials.

Program Analyst | NASA L'SPACE, Lucy Mission (LEAP) — May 2025 – January 2026

– Program Analyst Mentor for the Mission Concept Academy, with direct support for two teams (15–20 students) through NASA lifecycle milestones.

Deputy Project Manager of Resources | NASA L'SPACE Mission Concept Academy — January 2025 – May 2025

– Led cost, schedule, risk, and team progress for a robotic mission concept through Preliminary Design Review.

Claims Adjudicator | Road Vantage, Austin, Texas — April 2024 – September 2024

– Processed invoices, negotiated settlements, and authorized payments; received companywide mentions for service.

Senior Customer Service Representative | Gopuff, Remote — April 2021 – January 2024

– Supervised staff, wrote procedures, and handled escalated cases and fraud risk across internal systems and Gopuff's Uber partner platform.

Caregiver and Training Specialist | Kindred at Home, Abilene, Texas — December 2015 – May 2018

– Provided client care and training. Named Employee of the Month and Employee of the Quarter.

Projects

Vehicle Speed Monitor | *Python, YOLOv8, ByteTrack, OpenCV*

– Built a local vehicle-detection pipeline on public traffic stills (Austin ATD, Sacramento Caltrans, London TfL) with region-tagged evidence files and majority-vote labels. Counts are from still images, not calibrated speed, and the tool is not for enforcement.

Earth Storm | *Three.js, MediaPipe* | kristenfenwick.github.io

– Built a hand- and gaze-driven 3D Earth navigator that flies to cities and loads public park and transit camera stills, with a licensed Wikimedia Commons fallback.

Particle Storm | *Three.js, MediaPipe* | kristenfenwick.github.io/particle-storm

– Built a single-file browser particle system with real-time hand tracking.

Skills

Python, MATLAB, OpenCV, Three.js, data visualization, visual reasoning, prompt engineering, AI model evaluation, multimodal data analysis, technical documentation, project management
